Color: Pandora

EndureWalls™

DuPont™ Tedlar® Specialty Surfaces

KEEPING IT CLEAN AND HYGIENIC WHAT YOU NEED TO KNOW

Whether it's germs, permanent marker, or chocolate sauce, maintaining pristine walls can be a challenge for some, but not for Endure Walls™ Tedlar™ Wallcoverings. For more than 50 years, DuPont™ Tedlar® PVF technology has been a leader in the industry for protective surfaces and is now applying this proven technology to wallcoverings. With Endure Walls™ Tedlar™ Wallcovering, we have the classic designs you love as well as the cleanability, durability, and affordability you need to maximize your projects and business.

TYPE I AND TYPE II TEDLAR™ WALLCOVERINGS THAT EXCEED TYPE III DURABILITY

- **BACTERIA, MOLD, AND MILDEW RESISTANT.** Tedlar™ Wallcoverings are not degraded by bacteria, mold, or mildew and do not provide nutrients to assist growth.
- **CHEMICAL RESISTANT.** Because Tedlar™ Wallcoverings hold up to bleach, alcohol, and alkalis cleaners, you can disinfect easily. Proven to withstand 30 years in a high-traffic area of a hospital and still look like new.
- **HYGIENIC.** Tedlar™ Wallcoverings' ability to stand up to the harshest cleaning chemicals means you have easy-to-clean walls that will assist in maintaining a hygienic environment for years to come.
- **STAIN PROOF.** The chart on the back indicates various stains that are likely to be encountered in high-traffic areas and lists the most effective cleaning agents for easy removal. Repeated heavy cleaning does not affect Tedlar™ Wallcoverings.
- **INDOOR AIR QUALITY.** Material health is essential. Tedlar™ Wallcoverings has undergone rigorous testing to obtain a Health Product Declaration (HPD) contributing to healthy IAQ making it perfect for all your projects, including schools and healthcare facilities with sensitive individuals.
